CERTIFIED HEALTH COACH

Coaching is one of the most popular professions in the world. According to Wikipedia, Coaching is a form of development in which a person called a 'Coach' supports a learner or client in achieving a specific personal or professional goal by providing training & guidance.

Health Coaching is the use of evidence-based skillful conversation, knowledge and strategies to assessing, screening, documenting and developing sustainable programs, to actively and safely engage client/patient in health behavior change and attain optimal health.

The American Academy of International Education offers two programs to become 'Certified Health Coach'. The 1-Year Certificate Program (selected 16 courses out of 32) is designed for those who have at least a Bachelor's Degree in Health Sciences, Nutrition & Dietetics, Physical Education, Counseling, Wellness & Alternative Medicine, etc. while the 2-Year Diploma Program is designed for those with at least an Associate Degree or some college education, training, experience and a keen interest in health & wellness.

We require that our students exhibit excellent interpersonal communication, organizational & negotiating skills and the ability to develop high levels of medical & technical competence across a wide variety of discipline. A genuine desire to help the client become happy and healthy is fundamental to becoming a successful Health Coach.

Competency-based accelerated program, based on credits for previous studies, experience, research or examination may allow you to complete the program in less time. Most courses, including 'Continuing Education' may be available on line. New Trimester begins in Jan., April, July and October. Classes are held once or twice each week for our non-traditional, case-study basis, thought-provoking teaching methodologies, based on research, statistics & current issues in the ever-changing healthcare system.
